

4-Channel Analog Input Module 0/4-20 mA

Single-ended (S.E.)

Fig. 750 Series
Delivered without miniature WSB markers

The analog input module receives signals with standardized values of 0-20mA and 4-20mA.

The input channels of the module have one common ground potential.

The input signal is electrically isolated and will be transmitted with a resolution of 12 bits.

The internal system supply is used for the power supply of the module.
